SUMMARY

I am a results-oriented Full-Stack Developer with over 4 years of experience. My core expertise includes front-end development using HTML, CSS, and React.js (Basic), as well as backend development using PHP with the Laravel framework. I am experienced in building responsive, efficient, and scalable end-to-end web applications to meet both user and business needs. In addition, I have strong analytical and collaboration skills, enabling me to work effectively with cross-functional teams to deliver optimal digital solutions.

WORK EXPERIENCE

Front-End Development

2022 - 2024

- Learned the fundamentals of web development using HTML, CSS, and JavaScript.
- Created responsive website layouts and interactive user interfaces.
- Studied basic application design concepts and user experience principles.
- Built several simple website projects to improve front-end development skills.

PHP Native & Database Developer

2024 - 2025

- Learned backend development using PHP Native and MySQL databases.
- Studied SQL queries, database relationships, and CRUD operations.
- Developed simple web applications integrated with databases.
- Improved problem-solving and debugging skills in application development.

Laravel Developer Intern

2025 - 2026

- Develop and maintain strong relationships with partners, agencies, and vendors to support marketing initiatives.
- Monitor and maintain brand consistency across all marketing channels and materials.
